

SANTHRA K JOY

(+91) 9632688751 • kjoysanthra@gmail.com • [LinkedIn](#)

SKILLS

- **Cloud Technologies:** AWS Lambda, Amazon Managed Workflows for Apache Airflow (MWAA), API Gateway, S3, Kinesis, Glue Catalog, Athena, DynamoDB, Kubernetes (EKS), Load Balancer
 - **Databases:** Postgres, MySQL, Redis
 - **Tools & IDE:** VsCode, Git, Eclipse, Postman, Insomnia, GoCD, Terraform, Kibana
 - **Backend End Development :** Fast API , SpringBoot
 - **Front End Development :** ReactJS, HTML, CSS
 - **Data Processing:** Spark, PySpark, NumPy, Pandas, Databricks
-

WORK EXPERIENCE (4.5 years)

Software Engineer 2, Epsilon (2 year)

Mar 2023 - Present

ML Orchestration Service

- Built a ML Orchestration service using Databricks, Airflow, Kubernetes, and PostgreSQL to automate ML model deployment and versioning—reducing manual effort from 3 hours to minutes.

Built REST API for ML model configuration

- Build a backend application using Python FastAPI, SQLAlchemy to interface with a PostgreSQL database. The backend was deployed via AWS Lambda and API Gateway using Terraform, allowing client teams to configure ML models through UI.

Software Engineer 1, Epsilon (2 years)

Aug 2021 - Apr 2023

Client Data Standadizer

- Implemented Python notebook employing PySpark SQL for aligning client data with custom schema.
- This reduced hours manual effort of writing notebooks for each client to custom format in just 30 minutes.

Java Backend API

- Implemented a Java Gradle-built library encompassing business logic to retrieve recommendation scores from Redis cache, integrated JaCoCo for code coverage, Junit for unit tests, Checkstyle for style checks.

Cloud Infrastructure automation Pipeline for Onboarding New Clients

- Engineered GoCD automation pipeline using Terraform for AWS and Databricks Provider for creating resources for every client. This reduced manual provisioning time for each client from 2 hours to minutes.

Intern, Epsilon (0.5 year)

Jan 2021 - Jul 2021

- Implemented an automation pipeline using AWS services and Python scripts for streamline end-to-end testing processes. Here Pytest test suites were executed against ML models with synthetic client data.
-

EDUCATION

R V College of Engineering

Aug 2019 - July 2021

Masters in Computer Application, GPA- 9.2

Jyoti Nivas College

Aug 2016 - April 2019

Bachelors in Computer Application, GPA- 7.8

CERTIFICATIONS & ACHIEVEMENTS

- Problem Solving (Basic) Certificate from Hacker Rank.
- Udemy FastAPI certification (UC-075861f4-acbf-4249-949d-c2eb932367c2)
- Published paper on "Augmented Reality to help Public Safety Workers" in IJCRT(Paper ID: IJCRT2105832)
